WANTED: two A.I. SPECIALISTS

As an artificial insemination (A.I.) specialist, you'll have the opportunity to experience a career in the A.I. industry and work with today's most elite dairy and beef females to produce the next generation of impact bulls and females. This career provides the opportunity to be exposed to the elite in the A.I. industry and hone your breeding skills in both large-herd commercial operations and registered elite-embryo programs in the heart of it all -- southern Wisconsin.

The appropriate candidate will gain experience in areas such as:

- Large-herd tail chalking, heat detection, and A.I. services;
- Reproductive physiology and synchronization;
- Record analysis and reproductive consultation services;
- Automated-detection programs and health-monitoring systems;
- Select Reproductive Solutions (SRS) portfolio offered by Select Sires; and
- Select Mating Services (SMS) program and genetic training offered by Select Sires.

Ideal candidates for this career should have a strong agricultural background including:

- A dairy and/or beef focus;
 - Outstanding people skills, with service-orientated attitude;
 - Excellent communication skills; and
 - Strong work ethic and the ability to work on your own, as well as in a team structure.
- A.I. experience and knowledge of on-farm software is preferred, but not mandatory.

Position includes:

- Strong starting base salary with endless commission potential
- Full benefits package, paid vacation, paid time off, and potential for advancement

If you're interested in joining the largest artificial-insemination company in North America, send your completed application, résumé, and cover letter to Phillip Dieter at phildieter@ecselectsires.com.
