As the leading supplier of bovine genetics and services in southern Wisconsin, East Central/Select Sires (EC/SS) is excited to offer two summer internships. Cover letters and résumés for the communications and A.I. specialist internships will be accepted until Oct. 31, 2014.

Communications Intern

The communications intern is responsible for a variety of projects within the areas of public relations, written communications, print advertising, and social media. The appropriate applicant will also receive a broad range of experience with all East Central/Select Sires programs and services.

Duties may include, but are not limited to the following. The intern is responsible for interviewing customers and writing feature articles for the company newsletter -- as well as writing general news releases and customer testimonials. In addition, the intern will represent East Central/Select Sires at numerous functions throughout the summer including dairy shows, county fairs, and producer activities. Other duties include taking photographs, developing and designing brochures and various types of ads, and assisting with social-media programs.

Besides having an understanding of the dairy and beef industries, a successful candidate should be proficient in both written and oral communication, have experience with Microsoft Office programs, and have at least some training in InDesign and Photoshop. Additional training will be provided in all areas.

This internship is based in the Waupun, Wis., office.

Application deadline: Friday, Oct. 31, 2014

Artificial Insemination (A.I.) Specialist Intern

As the A.I. specialist intern, you will have the opportunity to experience a career in the A.I. industry and work with the breeds’ most elite females to produce the next generation of impact bulls and females. This internship provides the opportunity to be exposed to the best in the A.I. industry and hone your breeding skills in both large-herd commercial operations and registered elite embryo programs throughout Southern Wisconsin.

Training and experience will be provided:
• Reproductive physiology and synchronization;
• Large-herd tail chalking, heat detection, and A.I. services;
• Record analysis and reproductive-consultation services;
• Training with our automated-detection systems and health-monitoring systems;
• Select Reproductive Solutions Portfolio (SRS) offered by Select Sires;
• Select Mating Services (SMS) program and genetic training offered by Select Sires; and
• Bull-daughter picturing.

Ideal candidates for this internship should have a strong agriculture background:
• Dairy and/or beef focus;
• Outstanding people skills and be service orientated;
• Excellent communication skills;
• Strong work ethic and the ability to work on your own, as well as in a team structure; and
• A.I. experience and knowledge of on-farm software is preferred, but not mandatory.

Location: Flexible, but within EC/SS market area
