CHOOSE BETWEEN ONE OR MORE PEAK PATHWAYS

**Research and Development**  
Focus on producing elite bovine genetics and industry-leading reproductive products by working with genetic programs, production processes, data management, and research areas of PEAK.

**Bovine Production**  
Gain an understanding and appreciation regarding the semen production process – from working with top genetic bovine sires to performing semen processing duties within the laboratories.

**Genetics**  
Work within genetics to spend time with the female program leads, reproductive specialists, and the genetic support team to learn how all employees function to support a high-quality and intense genetic program.
